Seed Corn Specials

We can offer the following varieties of Central Illinois and Indiana grown Seed Corn, of known origin, butted and tipped, carefully milled and cleaned, packed in 2-bushel new burlap sacks, burlaps free:

Reid's Yellow Dent—Indiana Type.....	@ \$3.00
Reid's Yellow Dent—Illinois Improved Type.....	@ 2.90
Reid's Yellow Dent—Utility Type.....	@ 2.90
Krug Yellow Dent.....	@ 2.90
Leaming Corn.....	@ 3.00
Western Plowman.....	@ 3.00

all per bushel f.o.b. Chicago, prompt shipment.

All varieties are offered on the basis of our germination 90% or better with average tests about 95%. This corn is of the 1934 crop, gathered early and carefully processed before the heavy freezing. The moisture content averages less than 15%. It has been stored in warehouses the temperature of which has been carefully controlled. These varieties are well and favorably known throughout the principal corn producing sections of the Middle West and are especially suitable for Ensilage in the dairy sections, as well as for Cribbing purposes in sections where the growing season averages from 100 to 110 days.

There is no other crop that depends more on good planting stock than Seed Corn. Only a small amount is required to plant an acre still a variation of a few points in germination oft-times makes a difference of several bushels in the final outturn of the crop.

Seed Corn gathered early and properly cared for is assurance against weakened vitality that might show up later by uneven stands and unhealthy plants not able to withstand adverse growing conditions.

By handling known varieties of the highest quality you are in position to supply your customers with the best available. We suggest placing orders now while a full assortment can be had.

Your orders will have careful attention
